Team ID: XXXX

Department of Computer Science & Engineering
Graphic Era (Deemed to be University), Dehradun
Academic Session 2026–27

Team & Mentor Details

Team Information

Team ID: XXXX
Semester: 3rd / 5th
Section: XX
Domain: *XXXX*

Team Members

1. *Student Name – ID*
2. *Student Name – ID*
3. *Student Name – ID*
4. *Student Name – ID*

Mentor

Dr. / Mr. / Ms. Mentor Name

Interactions completed: _____

Brief Discussion: Introduce the team, project domain, mentor, and responsibilities of the team members.

Phase-I Recap & Feedback Incorporated

Phase-I Status

Briefly summarize what was proposed and achieved during Phase-I.

Feedback Received

- *Suggestion / Feedback 1*
- *Suggestion / Feedback 2*
- *Suggestion / Feedback 3*

Changes Incorporated

- *Modification 1*
- *Modification 2*
- *Modification 3*

Brief Discussion: Explain the major feedback received during Phase-I and clearly demonstrate how it has been incorporated.

Problem Statement & Finalized Objectives

Problem Statement

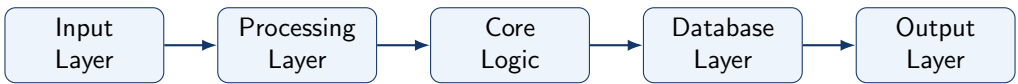

State the finalized problem being addressed after incorporating Phase-I feedback.

Finalized Objectives

1. *Objective 1*
2. *Objective 2*
3. *Objective 3*
4. *Objective 4*

Brief Discussion: Avoid repeating the complete Phase-I presentation. Focus on the finalized problem, scope and measurable objectives.

Updated System Architecture / Workflow

Major Components

- *Component 1*
- *Component 2*
- *Component 3*

Changes Since Phase-I

- *Architecture change*
- *New component*
- *Improved workflow*

Brief Discussion: Present the updated architecture and explain how individual modules communicate with each other.

Module Design & Functional Requirements

Major Modules

1. *Module 1*
2. *Module 2*
3. *Module 3*
4. *Module 4*

Functional Requirements

- *Functional Requirement 1*
- *Functional Requirement 2*
- *Functional Requirement 3*
- *Functional Requirement 4*

Module Dependency

Briefly describe dependencies and interactions between major modules.

Brief Discussion: Explain what each module does and how it contributes to the complete system.

Technology Stack & Development Methodology

Technology Stack

- Programming: *C / C++ / Other*
- Database: *MySQL / PostgreSQL*
- Framework: *XXXX*
- Development Tool: *XXXX*
- Version Control: *Git / GitHub*

Development Methodology

1. Requirement Analysis
2. System Design
3. Module Development
4. Integration
5. Testing & Validation

Brief Discussion: Explain why the selected technologies are appropriate and how the team is following the development methodology.

Implementation of PBL Course Concepts

Course	Concepts Actually Implemented	Project Module
Data Structures in C	*Arrays, Linked Lists, Trees, Graphs, Hashing, etc.*	*Module X*
OOPs with C++	*Classes, Inheritance, Polymorphism, STL, etc.*	*Module Y*
Operating Systems	*Processes, Scheduling, Memory, IPC, Synchronization, etc.*	*Module X*
DBMS	*SQL, Transactions, Normalization, Indexing, etc.*	*Module Y*

Important: Mention only those concepts that have been **actually implemented** in the project.

Brief Discussion: Students should explain where and how each course concept is technically implemented.

Development & Implementation Progress

Module	Status	Work Completed
Module 1	Completed	*Implementation details*
Module 2	Completed	*Implementation details*
Module 3	In Progress	*Current development*
Module 4	Pending	*Planned work*

Overall Project Completion: *XX%*

Brief Discussion: Clearly differentiate between completed, in-progress and pending development. Do not present proposed work as completed work.

Working Prototype / Demonstration

Implemented Features

- *Working Feature 1*
- *Working Feature 2*
- *Working Feature 3*
- *Working Feature 4*

Prototype / Output

Insert screenshot / output / prototype evidence here

Brief Discussion: Demonstrate the actual working implementation. Students should preferably provide a live demonstration in addition to screenshots wherever applicable.

Testing, Results & Validation

Test / Module	Expected Result	Observed Result	Status
Test 1	*Expected output*	*Observed output*	Pass
Test 2	*Expected output*	*Observed output*	Pass
Test 3	*Expected output*	*Observed output*	*Status*

Results / Validation

Mention suitable performance metrics, experimental results, accuracy, response time, test cases, validation results or other measurable observations.

Brief Discussion: Results should be supported by actual testing or experimental evidence rather than assumptions.

GitHub Repository & Development Activity

Repository Information

- GitHub Link: *Repository URL*
- README.md: *Updated*
- Contributors: *All Members Added*
- Repository Status: *Updated*
- Branches: *If Applicable*

Development Activity

- *Regular commits maintained*
- *Meaningful commit messages*
- *Individual contribution visible*
- *Latest implementation uploaded*
- *Documentation maintained*

Requirement: All team members must be contributors and must **commit individually using their own GitHub accounts**.

Brief Discussion: Show repository activity, README, contributor list and commit history during the presentation.

Individual Contribution

Member	Role	Technical Contribution	GitHub Commits
Member 1	*Role*	*Specific technical work completed*	*XX*
Member 2	*Role*	*Specific technical work completed*	*XX*
Member 3	*Role*	*Specific technical work completed*	*XX*
Member 4	*Role*	*Specific technical work completed*	*XX*

Individual Evaluation

Every member should be prepared to explain and demonstrate their own technical contribution to the project.

Brief Discussion: Contributions should be specific and verifiable. Avoid generic statements such as "helped in coding" or "worked on documentation".

Challenges, Remaining Work & Phase-III Roadmap

Challenges Faced

- *Technical challenge*
- *Integration challenge*
- *Data / implementation challenge*

Solutions / Learning

- *Solution adopted*
- *Technical learning*

Phase-III Roadmap

1. *Complete remaining modules*
2. *System integration*
3. *Testing / optimization*
4. *Final deployment / validation*
5. *Documentation*

Brief Discussion: Explain genuine technical challenges and provide a realistic roadmap for completing the project before Phase-III.

Expected Outcomes & References

Expected Final Outcomes

- *Complete working prototype / system*
- *Measurable technical results*
- *Practical / industry applicability*
- *Deployment / scalability potential*
- *Research / publication potential*

References

1. *Research paper / journal*
2. *Research paper / conference*
3. *Book / standard*
4. *Official documentation*
5. *Dataset / repository*

Thank You
Questions & Suggestions

Brief Discussion: Conclude with the tangible final outcome expected from the project and cite the major technical/research resources used.
